PRACTICAL NO 5 : VISUAL QUESTION ANSWERING (VQA)

```
from transformers import BlipProcessor, BlipForQuestionAnswering
from PIL import Image
import torch

#load BLIP Processor
processor =BlipProcessor.form_pretrained(
   "Salesforce/blip-vqa-base"
)
#load BLIP model
model = BlipForQuestionAnswering.from_pretrained(
   "Salesforce/blip-vqa-base"

)

#load image
image_path= "cat.jpg"
image= Image.open(image_path).convert("RGB")

Print("Image loaded Succesfully!")

while True:
   question = input("\nEnter your question (or type'exit' to stop):")

   if question.lower()== "exit":
      break

   #prepare image and question
   imputs= processor(
      images=image,
      text=question,
      return_tensors="pt"
```

```
    )

#generate answer
with torch.no_grad():
    output = model.generate(
        **inputs,
        max_new_tokens=20
        )

#convert output to text
    answer =processor.decade(
        output[0],
        skip_special_tokens=True
    )

    print("Answer:", answer)
```
